

RESEARCH AND DEVELOPMENT CELL

The Research Committee of an educational institute plays a pivotal role in fostering a culture of academic excellence and innovation. It is primarily responsible for overseeing the research activities within the institution, including guiding Ph.D. scholars throughout their academic journey, conducting Pre Ph.D. vivas and offering valuable suggestions to the scholars. It is also responsible to conduct final Ph.D. vivas of the scholars registered at the institute. It provides mentorship and support to Ph.D. candidates, helping them with their research proposals, methodologies, and dissertation development.

In addition to managing Ph.D. work, the Research Committee is also tasked with overseeing the institute's journal, which serves as a platform for disseminating scholarly articles, research findings, and academic discussions. The committee also promotes interdisciplinary research, collaboration with external institutions, and fosters an environment conducive to innovative thinking. By organizing workshops, seminars, and conferences, it creates opportunities for faculty, researchers, and students to engage in academic dialogues and stay abreast of emerging trends.

R&D Committee

S.No.	Name of the Faculty	Designation
